This thread has some very shocking stories and affidavits about forced and coerced abortions in the scientology Sea Org.

Ida Camburn posted this one today on ARS:

<http://www.planetkc.com/sloth/sci/mary.tabayoyon.html>

A friend of mine, Betty Hardin, who works in the treasury division of Golden Era Productions, told me that she used to transport the pregnant women at the base to Riverside, California for their abortions. For about a year, she transported women almost weekly to the Planned Parenthood Center, in Riverside, so that they could have their abortions and follow up check ups that were needed. She said it just became routine. Pregnant Sea Org members were sent to the Planned Parenthood Center to get their abortions. When they returned to the base they went to Ethics.

The term "Ethics" is used to name the place you go to have your ethics be back put in. To explain this in regular terms, you are sent to ethics any time you've gone off the rails, like went against Command Intention, mistakenly or purposefully, and the ethics officer would then work with you until you were again unswervingly dedicated to advancing Scientology and had made up the "damage". I will

explain more
about Ethics and its methods later.

Betty Hardin said, once formerly pregnant women were back from having their abortions, they would be sent to Ethics and made to do "lower conditions". Lower conditions are, from the lowest on up; Confusion, Treason, Enemy, Doubt, and Liability. Each one of these lower conditions have an exact set of steps you follow. once you get through all the steps of all the lower conditions, successfully, and only the Ethics officer can officially determine if you have gotten through it correctly, and thus let you go on to the next higher condition, you are a gung-ho Sea Org member again with new and revitalized determinism to never make a mistake again that would cause or threaten any harm to your group.
